

FINAL PROJECT SCREENSHOTS

HABIT LOOP MIRROR

"Screen Time tells you how much. We tell you why."

Name: Ramanarajarajan T

Internship ID: IBMUEML007043

College: KPR Institute of Engineering and Technology,
Coimbatore, Tamil Nadu

Fig. 1. Project Overview of Habit Loop Mirror

Fig. 2. User Sign-In Interface of Habit Loop Mirror

The image shows the 'Create Your Mirror Account' interface for Habit Loop Mirror. It features a dark background with a central form. The form has three input fields: 'EMAIL ADDRESS' with the placeholder 'name@example.com', 'PASSWORD' with the hint 'At least 6 characters', and 'CONFIRM PASSWORD' with the hint 'Repeat password'. Below these fields is a red 'Continue to Personalization' button with a right arrow. At the bottom of the form, there is a link 'Already have an account? Sign In'.

Fig. 3. User Account Creation Interface of Habit Loop Mirror

The image shows the 'STEP 1: CALIBRATION MODULE' interface for Habit Loop Mirror. It features a dark background with a central form. The form has a title 'What activities reward and re-energize you?' and a subtitle 'When you notice an impulse loop, what offline activities feel rewarding and effortless?'. Below the subtitle is a section 'SELECT ALL THAT APPLY' with a '3 selected' indicator. There are ten activity buttons: 'Coding & Building', 'Drawing & Sketching', 'Music & Playlists', 'Reading & Articles', 'Walking & Stepping Outside', 'Exercise & Stretching', 'Cooking & Brewing Tea/Coffee', 'Socializing & Voice Notes', 'Learning New Concepts', 'Creative Writing / Journaling', 'Relaxation & Breathwork', 'Outdoor Observation', 'Casual Mind Games', and 'Personal Craft Projects'. The first three buttons are selected. At the bottom right, there is a 'Skip optional' link and a red 'Next' button with a right arrow.

Kimi K3 Reasoning

Python analytics calculates ground truth statistics. Kimi K3 interprets and synthesizes the verified evidence into actionable self-awareness.

Habit Loop Mirror does not diagnose medical conditions or promise addiction cures. All recommendations represent self-chosen alternative responses to recurring digital triggers.

Baseline Digital Pattern Overview

Evidence BaseLine

HIGH CONFIDENCE

OBSERVATION

Your digital telemetry indicates total usage of 4h 42m, with primary concentration during 5 PM – 7 PM.

EVIDENCE

Peak usage window identified during 5 PM – 7 PM.

4 sessions recorded following direct app notifications.

Usage reflects standard distributed activity across focused work and leisure.

WHY IT MATTERS

Understanding your baseline rhythm allows you to recognize when digital usage is deliberate versus passive.

TRY THIS (SUBLIMATION & ALTERNATIVE CHOICE)

Review your Digital Day timeline to label session intentionality and explore Personal Swap options for peak hours.
